

## **Alexander König meets the Federal President Mr. Steinmeier and discusses advantages of robot-assisted therapy**

(26.04.2017)

The first stop of Frank Walter Steinmeier's first official visit as new president of the Federal Republic of Germany was the city of Munich. One of Mr. Steinmeier's requests was to get an insight into Munich's vibrant start-up community.

During an event at the "Allerheiligen Hofkirche" in Munich, our CEO Alexander König presented a 3D print model of our robotic system to the President and his wife. Also present were the Prime Minister of Bavaria, Horst Seehofer, and his wife Mrs. Seehofer. They discussed the opportunities arising from automatic therapy via robotics in Intensive Care Units in the aging society.

From left to right: Alexander König (Reactive Robotics), Katharina Kreitz (Vectoflow), Mr. Steinmeier, Mr. Seehofer, Mrs. Bündenbender (wife of Mr. Steinmeier), Mr. Rudolph (BayStartUp), Mr. Reinshagen (Navvis).
