

Founding

Established in 1995 on the initiative of the Bavarian State Government as a wholly owned subsidiary of LfA Förderbank Bayern.

Brief profile

With around €1.3 billion under management, investments of up to €50 million per company, and over 30 years of experience, Bayern Kapital is one of the most successful and experienced VC investors in the DACH region. The focus is on investments in innovative high-tech and deep-tech startups and scaleups in Bavaria, together with private co-investors. Since its foundation in 1995, Bayern Kapital has invested over €670 million of its own equity capital in more than 380 startups and scaleups in sectors such as life sciences, SaaS, climate tech, new space, nuclear fusion, quantum technology, and AI. The active Bayern Kapital portfolio has thus created around 7,500 jobs to date.

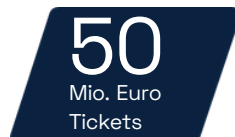

Investments

Bayern Kapital invests in startups and scaleups across all stages of development, from pre-seed to growth and scaleup to exit, providing capital, expertise, and networking opportunities. Bayern Kapital brings 30 years of experience in startup financing to each of its investments. As one of the few investors, Bayern Kapital can provide up to €50 million per company—the basis for acting as a reliable anchor investor over several rounds, especially in capital-intensive industries such as life sciences and deep tech.

Portfolio

Bayern Kapital currently has around 120 active portfolio companies, including many market leaders and industry giants.

Examples of numerous groundbreaking success stories that Bayern Kapital has supported from an early stage include Casavi, Catalym, commercetools, EGYM, EOS, Immunic, IQM, planqc, Parcellab, Proglove, Qbilon, Quantum Systems, Riskmethods, SimScale, Sirion, Tubulis, Marvel Fusion, OroraTech, Proxima Fusion, Akhetonics and many other tech pioneers.
